MAVEN TRAINING CORPUS — DEPENDENCY MAP

USAREUR-AF OPERATIONAL DATA TEAM | C2DAO TRAINING BRANCH

PUBLISHED OUTPUT: The authoritative HTML dependency map is `maven_training/DEPENDENCY_MAP.html` (7,400+ lines). **Do NOT overwrite it with the short ~900-line file produced by `scripts/generate_dep_map.py`.** That script generates a disposable summary — it must NEVER write to `DEPENDENCY_MAP.html`. If you need to update the dep map, edit `DEPENDENCY_MAP.html` directly. Never open, reference, or show the short generated version.

Generated: 13 March 2026 **Last structural change:** 18 March 2026 — Added T3 Train-the-Trainer tracks: T3-I (Instructor Certification, 5 days, prereq SL 3) and T3-F (MSC Force Multiplier / Unit Data Trainer, half day, prereq SL 2); added SL 4N (UI/UX Designer) and SL 4O (Platform Engineer) specialist tracks with SL 5N/SL 5O advanced tracks; ASF role alignment (PM, Designer, SWE, Platform Engineer); prereq chain extended G–O **Last updated:** 18 March 2026 (integrated USAREUR-AF Data and Analytics Strategy (CG-signed May 2025) and Unified Data Transition Strategy (CUI quarterly product cycle) into corpus — Sec 0B, Sec 5, External Refs, doctrine panel, publications index; changelog #118–119) **Audit method:** Full manual read of all source files across 6 parallel agent passes (13 March); ralf branch content migration (14 March); Palantir Developers video mapping (14 March); full ralf file inventory and PDF build (14 March); full content read of all 30 CDA slide decks (14 March) — level assignments corrected corpus-wide; pre-v2.0 content accuracy and consistency audit across all curriculum, app, widget, and PPTX files (14 March) **Status at generation:** Corpus at v2.0-ready state. All naming and content issues resolved. SL 4D/E/F prereq discrepancy resolved 2026-03-14 — all WFF tracks (SL 4A–F) now require SL 3 as terminal prerequisite. SL 4N (UI/UX Designer), SL 4O (Platform Engineer), and corresponding SL 5N/SL 5O advanced tracks added 2026-03-18 with ASF role alignment. Pre-v2.0 audit complete: 8 content fixes applied (README.md, POLICY_LETTER.md, cheatsheet.md, Home.tsx, TM40.tsx, mss_info_app/index.html, .gitignore, MSS_Project_Overview.pptx); MSS_Training_Progression.pptx specialist column fully rebuilt with clean WFF (A–F) / Specialist (G–O) grouping. PDFs regenerated (3 source-changed files rebuilt). See changelog entry #95–103.

NOTE

SL 5A through SL 5F do NOT exist. Only SL 5G–O (advanced specialist) are valid. WFF tracks (SL 4A–F) require SL 3 (same prereq chain as Specialist tracks) — design decision 2026-03-13. Specialist tracks (SL 4G–O) all require SL 3 (required, not recommended). SL 4N (UI/UX Designer) and SL 4O (Platform Engineer) align with Army Software Factory (ASF) role tracks. Together with SL 4J (PM) and SL 4L (SWE), these four tracks cover all ASF career paths. **Cross-track companions:** SL 4N ↔ SL 4J ↔ SL 4L form the ASF "balanced team" triad (Designer + PM + Engineer). SL 4O ↔ SL 4L (platform ↔ application boundary). SL 4O ↔ SL 4H (infrastructure for AI workloads). **Foundry Bootcamp (FBC)** is a separate quarterly event outside the TM chain. Prereq: SL 2. Does NOT grant SL 3 credit. Does NOT unlock SL 4 enrollment. See training_management/FOUNDRY_BOOTCAMP_SOP.md. **Senior Leader (EXEC)** is a separate 1-day executive course outside the TM chain. Audience: O-5 / E-9+. Replaces SL 1 for senior leaders. Terminal — does not unlock SL 2 or any further progression. Does NOT grant SL 1 credit. **T3-F (MSC Force Multiplier)** certifies Unit Data Trainers (UDTs) at the MSC level. Prereq: SL 2. Half day. Authorizes SL 1 delivery, SL 1 exam proctoring, and training status reporting. UDTs are the forward training presence between MTT rotations. Does NOT authorize SL 2 or any SL 3+ delivery. **T3-I (Instructor Certification)** is the formal C2DAO instructor pipeline. Prereq: SL 3 + OIC selection. Phase 1 is a 5-day classroom course (adult learning, lab facilitation, evaluation calibration, microteaching). Phase 2 is a supervised practicum scheduled around actual course iterations. Graduates are authorized to teach independently per domain qualification (FDP §2-1). See UNIT_DATA_TRAINER_SOP.md for T3-F governance and FACULTY_DEVELOPMENT_PLAN.md for T3-I certification standards.

CDA SLIDE LIBRARY OVERLAY (CONCEPTUAL PREREQS)

The CDA slide decks provide conceptual grounding that the TM series assumes but does not teach. They are recommended reading, not required prerequisites. They feed into the TM chain as follows.

Last alignment audit: 14 March 2026 — full content read of all 30 decks; level assignments corrected based on actual slide content vs. TM audience (user / no-code builder / advanced builder / code-level).

SECTION 0C — SENIOR LEADER EXECUTIVE COURSE (EXEC)

Audience: O-5 / E-9+. No prereqs. Terminal qualification — does not feed into TM pipeline.

Replaces SL 1 for senior leaders. Does NOT grant SL 1 credit.

File	Type	Outbound Dependencies
TM_EXEC_SENIOR_LEADER.md	[TM]	⇢ CG_GUIDANCE (strategic context), ⇢ DATA_LITERACY_technical_reference, ⇢ SL 1 (if SL wants hands-on)

SYLLABUS_TM_EXEC.md	[SYL]	→ EXEC [TM]
(no Exercise)	—	Assessment is organizational, not individual
(no Exam)	—	Qualification recorded as "Complete" upon attendance

Inbound references from: DEPENDENCY_MAP prereq chain, ENROLLMENT_SOP, ANNUAL_TRAINING_SCHEDULE, MTP, mss_info_app/index.html (if applicable)

Recommended pre-reading: ⇢ CG_GUIDANCE.md · DATA_LITERACY_technical_reference Ch 1

Key governance note: EXEC is a 1-day instructor-led course for O-5 / E-9+ personnel. It replaces SL 1 for this population. It covers formation-level data product impact, agile project management, working with data professionals, governance, and the training pipeline. It is terminal — senior leaders who want hands-on qualification enroll in SL 1 separately.

DRAFT

Key governance note: T3-F creates a sustainment capability, not a replacement for C2DAO instructors. UDTs deliver SL 1 between MTT rotations. UDTs do NOT deliver SL 2, SL 3, or any SL 4/SL 5 courses. Curriculum authority remains with C2DAO.

T3-I: Instructor Certification (C2DAO Instructor Pipeline)

Inbound references from: DEPENDENCY_MAP prereq chain, FACULTY_DEVELOPMENT_PLAN (certification phases), INSTRUCTOR_OVERVIEW (instructor tier structure), POI_MSS (program scope)

Key governance note: T3-I replaces the previous ad-hoc 4-phase apprenticeship with a structured, documented certification pathway. Phase 1 (classroom) covers adult learning principles, platform deep-dive from the instructor seat, lab facilitation, Go/No-Go standardization, microteaching, and common

trainee error management. Phase 2 (supervised practicum) is scheduled around actual course iterations — the candidate co-teaches, then leads under observation. Domain qualification for SL 4/SL 5 delivery is a separate requirement per FDP §2-1.

T3 cross-references: - T3-F ↔ T3-I: T3-I graduates may deliver T3-F during MTT rotations. T3-F is introduced in T3-I Ch 1 as the unit-level tier. - T3-F → UNIT_DATA_TRAINER_SOP: Governs UDT authorities, limitations, reporting, and recertification. - T3-I → FACULTY_DEVELOPMENT_PLAN: Defines instructor tiers (Instructor → Senior Instructor → Master Instructor), certification phases, and recertification requirements.

SECTION 8 — CDA SLIDE LIBRARY (REPOS/)

Source: `maven_training/source_material/course_portal/` **Format:** Slide decks (PNG images + PDF/PPTX downloads); manifest-driven **Status:** Not yet integrated into mss_info_app; planned as panel-slide-library **Role in curriculum:** Conceptual prereq layer — fills the "why and what" gap the TM series does not cover

All 29 decks listed below. Track assignment and TM alignment are authoritative for merge planning.

Track: Intro To Data (12 decks)

Deck ID	Title	Slides	TM Alignment	Notes
army_data_orientation_v1	Army Data Orientation	14	⇢ Data Literacy (SL) / all personnel	Direct parallel to doctrine panel content; Army-specific framing
architecture_primer	Architecture Primer	12	⇢ before SL 1	Orientation to the data stack before first MSS login
2026_Data_Stack_Deep_Dive	2026 Data Stack — Five Layers	10	⇢ SL 2	Explains the five-layer stack SL 2 teaches users to build in
L2_Ingestion_Integration_Deep_Dive	L2 Ingestion & Integration	10	⇢ SL 2	Pipeline concepts behind Pipeline Builder tasks

Deck ID	Title	Slides	TM Alignment	Notes
The_Semantic_Layer_Instructions	The Semantic Layer	11	⇢ SL 2 / SL 3	Why the Ontology layer exists; frames SL 2 Ontology Manager tasks
What_Is_An_Ontology	What Is an Ontology?	12	⇢ SL 2	Conceptual base for Object Types; gap in SL 2
Data_Modeling_Foundations	Data Modeling Foundations	11	⇢ SL 2 / SL 3	Normalization → strategy; underpins SL 3 architecture decisions
Data_Platforms_Cloud_Deep_Dive	Data Platforms & Cloud	10	⇢ SL 2 / SL 3	Where Foundry/MSS sits in the broader platform landscape
L5_Activation_Interface_Deep_Dive	L5 Activation & Interface	10	⇢ SL 2	Workshop conceptual grounding; explains why Workshop widgets exist
Dont_Filter_This_Isnt_Excel	Don't Filter — This Isn't Excel	11	⇢ SL 2	Critical mindset shift; Foundry vs spreadsheet mental model
decision_advantage_deep_dive	Decision Advantage	10	⇢ SL 4A–F (all WFF)	The "why" behind WFF data integration; all six WFF tracks
AI_ML_Beyond_The_Hype	AI/ML — Beyond the Hype	11	⇢ SL 4H / SL 4M	Conceptual framing required before AIP Logic and model training

Track: Data 101 (7 decks)

Deck ID	Title	Slides	TM Alignment	Notes
The_Four_Layers	The Four Layers	13	⇢ SL 2 / SL 3	Data layer model; directly maps to stack diagram in SL 2
Data_Modeling_Fundamentals_Level1	Data Modeling Fundamentals — Level 1	15	⇢ SL 2	Object type design patterns; prereq conceptual content for SL 2 tasks
ObjectType_WhatToWatchFor	Object Types — What to Watch For	13	⇢ SL 2 / SL 3	Anti-patterns; fills gap neither SL 2 nor SL 3 covers
Links_and_Relationships	Links & Relationships	11	⇢ SL 2	Link type conceptual base; maps to "Create Link Types" in SL 2
Controlled_Vocabularies	Controlled Vocabularies	11	⇢ SL 3 / SL 4K	Vocab standardization; SL 4K owns this operationally

Deck ID	Title	Slides	TM Alignment	Notes
Identity_Who_Owns_The_Key	Identity — Who Owns the Key?	11	⇢ SL 3 / SL 4K / SL 4L	Primary keys, master data, identity governance
Dont_Filter_This_Isnt_Excel	(see Intro To Data above)	—	⇢ SL 2	Listed in both tracks in source manifest

Track: Data 201 (10 decks)

Deck ID	Title	Slides	TM Alignment	Notes
Semantic_Modelling_Course_Intro	Semantic Modelling — Course Intro	10	⇢ SL 3 / SL 4L	Entry to formal semantic modeling; SL 3 architects and SWEs
Deck_01_Architecture_First_Principles	01 — Architecture First Principles	10	⇢ SL 3 / SL 4L	Core architecture decision principles; above SL 3 procedure level
Deck_02_Scope_Engineering	02 — Scope Engineering	10	⇢ SL 3 / SL 4J	How to scope a data problem; SL 3 governance + PM track
Deck_03_RDF_OWL_Foundations	03 — RDF & OWL Foundations	10	⇢ SL 4K / SL 4L	RDF triples, OWL classes; knowledge graph and semantic layer work
Deck_04_Object_Type_Varieties	04 — Object Type Varieties	10	⇢ SL 3 / SL 4L	Advanced object type design patterns
Deck_05_Identity_Governance	05 — Identity & Governance	10	⇢ SL 3 / SL 4K	Formal governance patterns for shared ontology
Deck_06_Relationship_Modeling	06 — Relationship Modeling	10	⇢ SL 3 / SL 4L	Advanced link type and relationship design
Deck_07_Temporal_Bitemporal	07 — Temporal & Bitemporal	10	⇢ SL 4G / SL 4M / SL 4L	Time-aware data modeling; ORSA time series + SWE pipeline patterns
Data_Modeling_Fundamentals_Level2	Data Modeling Fundamentals — Level 2	13	⇢ SL 4G / SL 4M / SL 4L	Advanced modeling; senior technical specialist level
Deck_12_Capstone_Foundry	12 — Capstone: Foundry	10	⇢ SL 4G / SL 4H / SL 4L	Bridges CDA theory to Foundry/MSS practice; single highest-value deck for specialists

CHANGE LOG — ISSUES FOUND & FIXED (12 MARCH 2026 AUDIT)

#	File	Line	Issue	Fix Applied
1	TM_40G_ORSA.md	81	"see SL 3 and SL 4G/40B" — SL 4B is WFF Fires, not pipeline dev	Changed to "see SL 3"
2	SYLLABUS_TM40J.md	9	SL 3 listed as "recommended but not required" — contradicts TM source	Changed to "SL 1/20/30 all required"
3	SYLLABUS_TM40K.md	9	SL 3 listed as "recommended" — contradicts TM source	Changed to "SL 1/20/30 all required"
4	POI_MSS.md	38, 51–52	SL 4J/K listed outside SL 3 branch; labeled SL 3 as exception	Fixed prereq tree; SL 4J/K now under SL 3 branch
5	CAD_MSS.md	71–72, 75	SL 4J/K prereq listed as "SL 3 recommended but not required"	Updated to "SL 3 required"; advisory note updated
6	ENROLLMENT_SOP.md	63–64	SL 4J/K prereq listed as SL 1/20 only	Updated to include SL 3 required
7	MTP_MSS.md	58–66	Multiple duration errors: SL 2=2d (should be 5), SL 3=3d (should be 5), SL 4G/H/M/L=4d (should be 5), SL 4J/K prereq=SL 2 (should be SL 3)	All durations and prereqs corrected
8	ANNUAL_TRAINING_SCHEDULE.md	120, 133, 188	SL 4J/K prereq listed as SL 2; prereq chain table omitted SL 3	Updated all three locations
9	(PDF) 42 stale PDFs	—	Old specialist naming scheme (e.g., A=ORSA instead of G=ORSA; stale 50-series A–F existed)	Deleted all 42 stale PDFs
10	build_pdfs.py	—	Missing WFF syllabi A–F, exams A–F, exercises A–F	Added all to MD_TARGETS and PUB_TYPES

AUDIT VERIFICATION COMMANDS

```
# Run full corpus audit (from repo root)
python3 scripts/audit.py
```

```
# Rebuild PDFs for changed source files
python3 scripts/build_pdfs.py

# Verify PDF count and check for stale files
ls maven_training/pdf/*.pdf | wc -l
```

Expected audit result: PASS — 0 issues

CHANGE LOG — ISSUES FOUND & FIXED (13 MARCH 2026 SECOND FULL AUDIT)

OPEN ITEM — RESOLVED:

#	Files Affected	Issue	Resolution
OPEN-1	TM_40A–F [TM], CONCEPTS_GUIDE_TM40A–F [CG], SYLLABUS_TM40A–F [SYL], mss_info_app, mss_widget, DEPENDENCY_MAP	WFF tracks prereq inconsistency — some files stated SL 2 only, others SL 3.	**RESOLVED 2026-03-13:** Design decision — all WFF tracks (SL 4A–F) now require SL 3 (same prereq chain as Specialist tracks, SL 1 + SL 2 + SL 3). All governance docs and app files updated. TM/CG content files require separate update pass to align.

CHANGE LOG — RALF BRANCH MIGRATION (14 MARCH 2026)

CHANGE LOG — PDF BUILD: ARCH / MGMT / REF SERIES (14 MARCH 2026)

Scope: 42 new PDFs generated for all ralf-branch architecture, management, and reference docs. Distinct naming convention (`ARCH_`, `MGMT_`, `REF_`) to clearly separate from TM/CG/SYL/EX/EXAM corpus.

PDF naming scheme:

Prefix	Category	PUB_TYPE label	Example stems
`ARCH_CDA_`	CDA Doctrine & Agents	ARCHITECTURE REFERENCE / ODT-CDA	ARCH_CDA_AGENTS_CORE_PRINCIPLES, ARCH_CDA_CANON_ADP_CROSSWALK
`ARCH_GDAP_`	GDAP Platform	ARCHITECTURE REFERENCE / ODT-GDAP	ARCH_GDAP_OVERVIEW, ARCH_GDAP_ADR_0001_LLAMAINDEX
`ARCH_MIM_`	MIM Reference	ARCHITECTURE REFERENCE / ODT-MIM	ARCH_MIM_STANDARD, ARCH_MIM_ACADEMICS
`ARCH_EA_`	Enterprise Architecture	ARCHITECTURE REFERENCE / ODT-EA	ARCH_EA_01_FOUNDATION, ARCH_EA_05_MILITARY_APPLICATION
`ARCH_ONTOLOGY_`	Ontology Design	ARCHITECTURE REFERENCE / ODT-ONT	ARCH_ONTOLOGY_DESIGN_PRINCIPLES
`MGMT_`	Management / Planning	SENIOR LEADER GUIDANCE or ENTERPRISE PLAN	MGMT_CG_GUIDANCE, MGMT_ENTERPRISE_V10_PLAN
`REF_`	Quick Reference	QUICK REFERENCE / ODT-REF	REF_DOCTRINE_ELEMENT_FOUNDRY_MAPPING, REF_EA_VS_DA

#	Action	Files	Output
93	scripts/build_pdfs.py — PUB_TYPES + MD_TARGETS expanded	Added ARCH_CDA/GDAP/MIM/EA/ONT, MGMT_, REF_ key prefixes and 42 source paths	42 new PDFs in maven_training/pdf/

#	Action	Files	Output
94	DEPENDENCY_MAP.md	Updated header metadata; added changelog entries #74–94	This file

CHANGE LOG — PRE-V2.0 FULL-CORPUS AUDIT (14 MARCH 2026)

Scope: Team-of-teams content accuracy and consistency audit across all curriculum files, React widget, HTML app, Python scripts, and PPTX presentation files. Primary goal: verify prereq chain enforcement (SL 3 hard prereq for ALL SL 4 tracks A–F and G–O) and content alignment between all delivery surfaces.

Audit findings and resolutions:

#	File	Issue	Resolution
95	README.md (root)	WFF prereq stated SL 2 in 4 places (table, tree, footnote lines)	Fixed → SL 3 in all 4 locations
96	maven_training/training_management/POLICY_LETTER.md	Official governance table: WFF tracks listed SL 2 as prereq	Fixed → SL 3
97	maven_training/mss_widget/src/panels/Home.tsx	WFF specialist row "Start Here" cell showed SL 1 → SL 2 only; SL 3 missing	Fixed → SL 1 → SL 2 → SL 3 chain
98	maven_training/quick_reference/cheatsheet.md	WFF track description said "after SL 2"; prereq chain diagram wrong	Fixed → SL 3 throughout; diagram rebuilt with WFF + Specialist both branching from SL 3
99	maven_training/mss_widget/src/panels/TM40.tsx	SL 4J card: builder-focused language ("PM Dashboards, Reporting Pipelines") mismatched actual TM content (Agile PM theory, ML lifecycle, stakeholder mgmt); BLUF embedded full WFF track list creating confusion	Fixed: SL 4J card rewritten to PM theory; BLUF simplified with cross-reference to HOME tab
100	maven_training/mss_info_app/index.html	SL 4J card matched stale builder-focused TM40.tsx (dual-maintenance surface)	Fixed: SL 4J card updated to match TM40.tsx (PM theory content)
101	.gitignore	node_modules/ missing; 65MB React deps at risk of commit	Added node_modules/

#	File	Issue	Resolution
102	maven_training/pdf/MSS_Project_Overview.pptx	Slide 1: old "6 Specialist Tracks: 40A ORSA · 40B AI · 40C MLE..." scheme	Rebuilt via python-pptx: "12 Tracks (WFF + Specialist) / WFF (A–F): Intel · Fires · M&M / Specialist (G–O): ORSA · AI Eng · MLE · PM · KM · SWE · UX · PE"
103	maven_training/pdf/MSS_Training_Progression.pptx	Specialist column: original 6-slot design insufficient; partial fix left WFF A–D mixed with specialist H–I, sub-headers misplaced	Full column rebuild via python-pptx: deleted all 19 old content shapes; clean layout with "▸ WFF TRACKS (A–F)" (A–F) / "▸ SPECIALIST (G–O)" (G–O) sub-headers; SL 5 G–O note added at bottom
104	scripts/build_pdfs.py (PDF rebuild)	3 source files changed: POLICY_LETTER.md, cheatsheet.md, task_index.html	Hash-based rebuild: 3 PDFs regenerated (POLICY_LETTER.pdf, CHEATSHEET.pdf + task_index.html-derived); 199 unchanged
105	DEPENDENCY_MAP.md	Audit findings not logged	This entry
106	SYLLABUS_TM40B.md, TM40_WFF_LESSON_PLAN_OUTLINES.md, DEPENDENCY_MAP.md	ATP 3-60 (inactive, May 2015) referenced instead of superseding FM 3-60 (Aug 2023)	replace_all ATP 3-60 → FM 3-60 in all 3 files (2 + 4 + 1 = 7 instances)
107	DEPENDENCY_MAP.md	No external doctrinal reference index	Added "External Doctrinal References" section with 32-pub table
108	TM_40E, SYLLABUS_TM40E, DEPENDENCY_MAP, index.html, index_sharepoint.html, TM40_WFF_LESSON_PLAN_OUTLINES	Phantom FM 3-37 cited (pub does not exist); protection capstone is ADP 3-37	Removed/replaced FM 3-37 → ADP 3-37 across 6 files (10 edits); zero instances remain
109	TM_50K_KNOWLEDGE_MANAGER_ADVANCED	FM 6-01.1 cited (pub type wrong); correct is ATP 6-01.1	Changed FM 6-01.1 → ATP 6-01.1 (Techniques for Effective Knowledge Management)

DRAFT

#	File	Issue	Resolution

CHANGE LOG — DDOF PLAYBOOK V2.2 RECONCILIATION (17 MARCH 2026)

Scope: Reconcile corpus with authoritative DDOF Playbook v2.2 (December 2025, T2COM C2DAO / HQDA CIO/G-6 / SAIS-ADD, CUI // FEDCON). Key changes: VAULTIS-A dimension names corrected, DDOF acronym expansion corrected, phase timelines updated, version references updated from v2.0 to v2.2.

VAULTIS-A authoritative definition (v2.2, p.9 glossary p.16): Visible, Accessible, Understandable, Linked, Trusted, Interoperable, Secure, Auditable. Supersession: VAUTI (5, AR 25-1 2019) → VAULTIS (7, DoD Data Strategy 2020) → VAULTIS-A (8, DDOF Playbook v2.2 2025).

Phase timelines (v2.2 Quick Reference Guide, p.14): Phase 1: 3-5 days | Phase 2: 5-10 days | Phase 3: 7-12 days | Phase 4: 15-25 days | Phase 5: 7-12 days | Total IOC: 30-60 days.

New v2.2 content not yet integrated into TM series (noted for future integration): - Genesis Mission Alignment (3 directives: Decision Dominance, Bureaucracy Elimination, Accountability) - Secretary of the Army Priorities mapping (Warfighter First, Speed Over Perfection, Cut the Fat, Trust the Troops) - ADC Registration Requirements for Phase 6 - Configuration Management Friction Matrix - Data Product Retirement criteria (90 days no access → FDM review, 180 days → retirement, quality <70% → remediate/retire) - Roles table (Decision Maker O-6+, C2DAO O-4/O-5, FDM O-3/O-4, etc.) - Platform-agnostic note: "works with Vantage, ADVANA, or any approved system"

MSS TRAINING ANALYTICS SUITE

Toggle: Check the "Analytics Apps" checkbox in the HTML dependency map to overlay the app architecture on the corpus graph. **Standalone reference:** See `analytics_apps/DEPENDENCY_MAP.md` for full app catalog, ports, startup sequence, and cross-app dependency graph.

The analytics suite (15 Streamlit micro-apps + portal + shared theme) is integrated into the HTML dependency map as a toggleable layer on the far right. Apps are positioned by tier:

```
[HUB]         portal.py (8500)
[AGGREGATOR]  training_metrics (8015/8515)
[CORE]        readiness_tracker (8001/8501)
[DEPENDENT]   progress_tracker (8004/8504) → readiness_tracker
[STANDALONE]  exam_analytics, aar_aggregator, mtt_scheduler,
              xref_validator, glossary_search, offline_packager,
              sharepoint_sync, data_quality, instructor_manager,
```

```
                enrollment_manager, curriculum_tracker, lessons_learned
[SHARED]        theme.py
```

Key relationships: - `readiness_tracker → progress_tracker` (hard runtime dependency) - All apps `→ training_metrics` (soft aggregation) - `readiness_tracker + exam_analytics + aar_aggregator → portal` (mandatory) - `theme.py → ALL dashboards` (branding)

Source: Ontologize YouTube channel (@Ontologize) — official Palantir partner training videos. **Source:** Palantir Developer Community (community.palantir.com) — product guidance, feature announcements, community Q&A. **Integration method:** (1) README.md § Supporting Reference Material — indexed with TM cross-references. (2) All 13 SELF_STUDY_ADDENDUM.md files — companion resource cross-reference to Ontologize channel. (3) Inline NOTE callouts in TM files for specific Palantir best practices (PK rules, project architecture, object type naming, Defense OSDK, Compute Modules, DDIL inference, AI-FDE). (4) Exercise packages — Build with AIP official tutorial references. **Verification:** Community content is user-generated and may reference deprecated features. "Inside the Product" posts (Palantir staff) carry higher authority. All community content should be cross-referenced against official docs and current MSS environment before incorporation.
