MSS Training Curriculum — USAREUR-AF

Version 3.0 • March 2026

ℹ NEW TO MSS?

Start with the Quick Start guide before reading TM-10. It gets you operational in 30 minutes: log in, navigate, filter data, and export a view. → **QUICK_START.pdf**

▶ BLUF

Find your level below and follow the training path. All personnel start at TM-10. Builders add TM-20. All TM-40 tracks (WFF and specialist) require TM-30. Use the sidebar to navigate to your specific guidance.

STEP 1 — FIND YOUR LEVEL

YOU ARE…	START HERE	THEN	TAB
Any Soldier, officer, or civilian — using MSS to access and consume data	TM-10 (User)	—	TM-10
All staff — building dashboards, forms, or pipelines without coding	TM-10	TM-20 (Builder)	TM-20
Any staff building solutions, owning pipelines, or planning a TM-40 track — required for all TM-40 tracks	TM-10 → TM-20	TM-30 (Advanced)	TM-30
WFF specialist — assigned Intel, Fires, M&M, Sustainment, Protection, or Mission Command role (TM-40A–F)	TM-10 → TM-20 → TM-30	TM-40 WFF track	TM-40
Technical specialist — ORSA, AI/ML, MLE, PM, KM, SWE roles (TM-40G–L)	TM-10 → TM-20 → TM-30	TM-40 specialist track	TM-40
Senior leader (O-5+ / SGM+) directing a data-capable formation	Data Literacy (SL)	Optional: Data Literacy	DRAFT PUBS

YOU ARE…	START HERE	THEN	TAB
Anyone wanting data literacy background before touching MSS	Data Literacy	TM-10	DRAFT PUBS

STEP 2 — FOLLOW THE TRAINING PATH

OUTSIDE THE PIPELINE — BACKGROUND READING (NOT REQUIRED BEFORE TM-10, BUT RECOMMENDED)

SL

DATA LIT (SL) — OPTIONAL (O-5+ / SGM+)

Data Literacy for Senior Leaders → Draft Pubs

Principles, command responsibilities, decision frameworks

ALL

DATA LITERACY — RECOMMENDED (ALL PERSONNEL)

Data Literacy Reference → Draft Pubs

Platform-agnostic data literacy; recommended before TM-10

1

TM-10 — REQUIRED FOR ALL PERSONNEL

Maven User Manual → TM-10

CAC login, navigation, Workshop apps, data viewing, AI tools, security

2

TM-20 — ALL STAFF (NO-CODE BUILDER)

Builder Manual → TM-20

Pipeline Builder (visual), Ontology Manager UI, Workshop app builder

3

TM-30 — ADVANCED BUILDERS & REQUIRED FOR ALL TM-40

Advanced Builder Manual → TM-30

Complex app design, Ontology architecture, governance, C2DAO standards

4

TM-40 — TWO TRACK TYPES (BY ROLE)

Specialist & Warfighting Function Tracks → Specialist Tracks

WFF Tracks (TM-40A–F): Intel • Fires • M&M • Sustainment • Protection • Mission Command

Technical Tracks (TM-40G–L): ORSA • AI Eng • MLE • PM • KM • SWE — Advanced versions at TM-50G–L

i TM-40 TRACK SELECTION — BY MOS / ROLE

Warfighting Function Tracks (TM-40A–F):

Intelligence (TM-40A): G2/S2, MI units, ISR analysts
Fires (TM-40B): FA officers/NCOs, fire support coordinators
Movement & Maneuver (TM-40C): Maneuver units, G3/S3 data roles
Sustainment (TM-40D): Logistics, G4/S4, GCSS-A users
Protection (TM-40E): Air defense, CBRN, engineer, force protection
Mission Command (TM-40F): G6/S6, C2 systems, network managers

Technical Specialist Tracks (TM-40G–L):

ORSA (TM-40G): FA49, G2/S2 quant analysts, wargame specialists
AI Engineer (TM-40H): AI/ML specialists, 17A/17C
ML Engineer (TM-40I): ML engineers, data scientists (GS/contractor)
Program Manager (TM-40J): G8/S8, PMs, resource managers
Knowledge Manager (TM-40K): KMOs, 37F, institutional memory leads
Software Engineer (TM-40L): 17A/17C, 25D/25U, GS/contractor SWEs

Not listed? Ask your commander — you may be assigned a track based on unit needs.
Full mapping: **Specialist Tracks →**

• NOTE — MSS ACCOUNT ACCESS

MSS access requires a provisioned account. Submit your request through your unit data steward or at **mss.data.mil**. Provisioning generally completes within 24 hours; if access is not active after 24 hours, contact your data steward directly. Do not wait until the start of a deployment or exercise.

ADVANCED & TECHNICAL TRACKS

Specialist Tracks — TM-40 & TM-50 Series

Role-specific developer manuals for ORSA, AI Engineer, ML Engineer, Program Manager, Knowledge Manager, and Software Engineer. Prerequisite: TM-30 complete.

Access Specialist Tracks →

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

TM-10

Maven User Manual — All Personnel

No technical background required • Prerequisite: None • **Open PDF →**

▶ BLUF

TM-10 teaches you how to log in, navigate MSS, read dashboards, use Gaia and command-level applications, submit data through forms, interact with AI tools embedded in Workshop, and stay within authorized boundaries. Required for all USAREUR-AF personnel before operating MSS. **Request your account before your first class — submit at mss.data.mil or through your data steward. Provisioning generally completes within 24 hours.**

ℹ PUBLICATION

TM-10 — Maven User Manual — Full technical manual. **Open PDF →**

⚑ CAUTION — REQUEST YOUR ACCOUNT FIRST

You cannot log in without a provisioned account. **Do not wait until the first day of class.** Request your account at **mss.data.mil** or through your unit data steward — provisioning generally completes within 24 hours. If access is not active after 24 hours, contact your data steward. Steps are in Section 1 below.

1. GETTING ACCESS — DO THIS FIRST

1. Find your **unit data steward** (data stewards may be embedded in your unit, assigned at battalion, brigade, or division level, or positioned within a directorate at the ASCC — ask your chain of command if you're unsure who to contact).
2. Ask them to submit an MSS account request with your name, unit, MOS, and required access level.
3. MSS admin team provisions your account and assigns **markings** (markings = the data categories and classification levels you're authorized to see).
4. You receive notification when account is active — typically 3–5 business days.
5. Receive the MSS portal URL from your unit data steward. This is your login link.

• NOTE — DATA STEWARD

Your **data steward** manages MSS access and data quality for your organization. They may be embedded in your unit, assigned at a higher echelon, or positioned within a directorate at the ASCC. They are your first point of contact for account requests, access problems, and data errors. If you don't know who they are, ask your chain of command.

2. WHAT IS MSS?

MSS is a secure, web-based platform where your unit's data lives and can be analyzed and acted upon. Think of it as a shared operations center for data: information from logistics, personnel, readiness, and other systems is collected, organized, and made accessible through applications your unit uses every day.

MSS is built on the Palantir Foundry platform, authorized for Army use under the Maven Smart System program.

• NOTE — WHAT IS FOUNDRY?

Palantir Foundry is a commercial data platform that Army headquarters selected to run MSS. You do not need to know how it works — just how to use it. The word "Foundry" may appear in help documentation and system menus; it refers to the same platform as MSS.

MSS DOES

- Stores data from Army systems in a single, organized location
- Makes data visible through applications and dashboards
- Enables units to update records, report status, and track readiness
- Provides analysis tools for authorized personnel
- Supports AI-assisted analysis through AIP tools embedded in applications
- **Gaia** — map-based geospatial application for situational awareness and operational overlays
- Command-level applications (e.g., CUB/CUA in USAREUR-AF) for operational briefing and C2

MSS IS NOT

- Not a replacement for official systems of record (DCPDS, GCSS-A, MEDPROS, etc.)
- Not classified by default — classification depends on data markings
- Not a public system — access is controlled and audited

USAREUR-AF MISSION AREAS

- **Personnel Readiness** — soldier readiness status
- **Logistics** — equipment availability & maintenance
- **Operational Reporting** — SITREPs and updates

- **Planning** — orders, unit positions, task org
- **C2** — unit status across the AOR

3. SECURITY RESPONSIBILITIES

⚠ WARNING

Unauthorized access to, disclosure of, or modification of data in MSS may constitute a violation of 18 U.S.C. § 1030 (Computer Fraud and Abuse Act) and applicable Army regulations. Violations may result in disciplinary action, loss of access, and criminal prosecution.

1. Use only your own credentials. Do not share your CAC, PIN, or access tokens.
2. Access only data you are authorized to view.
3. Report misrouted data immediately. If you see data at a higher classification than your clearance — STOP and report it.
4. Do not export data without authorization. Exports are logged.
5. Log out when done. Do not leave an MSS session unattended on an unlocked workstation.
6. Report security incidents immediately to your supervisor and unit security officer.

4. TASKS

TASK: ACCESS THE MAVEN SMART SYSTEM

CONDITIONS	STANDARDS	EQUIPMENT
Provisioned MSS account, CAC reader, approved workstation and browser	Successfully authenticate with CAC and reach the MSS home screen	CAC, CAC reader, workstation, MSS portal URL (from unit data steward)

1. Insert your CAC into the CAC reader.
2. Open an approved web browser (Chrome or Firefox recommended).
3. Navigate to the MSS portal URL provided by your unit data steward.
4. When prompted, select your **authentication certificate** (not email certificate).
5. Enter your CAC PIN when prompted.
6. MSS home screen loads — you are now logged in.

⚑ CAUTION

Do not save your PIN in the browser. Do not allow the browser to remember your login. MSS sessions may contain sensitive information.

TASK: NAVIGATE THE MSS HOME SCREEN

CONDITIONS	STANDARDS
Logged into MSS	Identify all major navigation elements; locate search, notifications, and profile

ELEMENT	LOCATION	PURPOSE
Search bar	Top center	Find datasets, applications, and projects
Notification bell	Top right	System alerts, workflow updates
User profile icon	Top right	Account settings, markings (your authorized data categories), logout
Compass (file explorer)	Left sidebar	Browse all MSS resources
Home button (logo)	Top left	Return to home screen from anywhere
Pinned items	Home main area	Shortcuts to frequently used resources
Recent activity	Home main area	Recently visited datasets and apps

5. REPORTING PROBLEMS

PROBLEM TYPE	WHO TO CONTACT
Cannot log in	MSS Help Desk
Cannot access a project	Unit data steward

PROBLEM TYPE	WHO TO CONTACT
Data appears incorrect	Unit data steward (do not correct it yourself)
System error or crash	MSS Help Desk (provide error code and screenshot)
Security incident	Supervisor and unit security officer — IMMEDIATELY
Application not working	MSS Help Desk

SCHED UPCOMING TRAINING — TM-10

• ENROLLMENT

Contact the listed POC to reserve a seat. Bring your CAC and ensure your MSS account request is submitted at least 5 business days before the course start date. Virtual sessions require MS Teams access and a headset.

DATES	LOCATION	FORMAT	POC	SEATS	STATUS
14 APR 2026	Wiesbaden, Clay Kaserne, Bldg 3312, Rm 104	In-Person	SSG Johnson	20 / 20	**OPEN**
05 MAY 2026	Grafenwöhr, Bldg 244, Conf Rm B	In-Person	SFC Davis	8 / 20	**8 SEATS REMAINING**
18 JUN 2026	Stuttgart, Kelley Bks, Bldg 3357	In-Person	SSG Martinez	20 / 20	**OPEN**
09 JUL 2026	Virtual (MS Teams)	Virtual	SSG Johnson	30 / 30	**OPEN**

Duration: 1 day (8 hours). Course runs 0800–1700. All dates subject to change — confirm with POC 5 days prior.

NEXT LEVEL — AFTER TM-10

TM-20 — No-Code Builder Manual

Learn to ingest data, build Workshop applications, create Object Types, and manage projects — all without coding. Required prereq for all builder roles.

Continue to TM-20 →

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

TM-20

No-Code Builder Manual — All Staff

Prerequisite: TM-10 • No coding required • Open PDF →

▶ BLUF

TM-20 teaches you how to ingest data, build Workshop applications, create Object Types and basic Actions, and manage projects — all using the graphical user interface. No coding required. Prerequisite: TM-10 complete.

ℹ PUBLICATION

TM-20 — No-Code Builder Manual — Full technical manual. Open PDF →

COMPETENCIES UPON COMPLETION

PROJECT MANAGEMENT (UI)

- Use **Solution Designer** to visually map data flows and application architecture before building
- Build project roadmaps using forward and backward planning from the commander's requirement
- Create and organize Foundry projects via the UI
- Set up folder structure: raw / staging / curated layers
- Manage project access and permissions via UI
- Follow USAREUR-AF naming conventions and builder standards

DATA INGEST (NO CODE)

- Ingest data using Pipeline Builder — visual, no code
- Configure connectors and file sources via UI
- Schedule pipeline runs via UI
- Understand raw / staging / curated dataset layers

ONTOLOGY (UI)

- Create Object Types and set primary keys via Ontology Manager UI
- Define **Interfaces** and apply them to Object Types for consistent property contracts

WORKSHOP APPLICATIONS

- Build and publish Workshop applications with dashboards, forms, and filters
- Select and configure appropriate widgets for each use case

- Configure **Object Views** to control how properties display to operators
- Create Link Types between objects via UI
- Understand Action types (write-back, form, webhook, conditional) and configure basic Actions
- Validate Object data in **Object Explorer** before building apps

- Apply access controls and publish to users

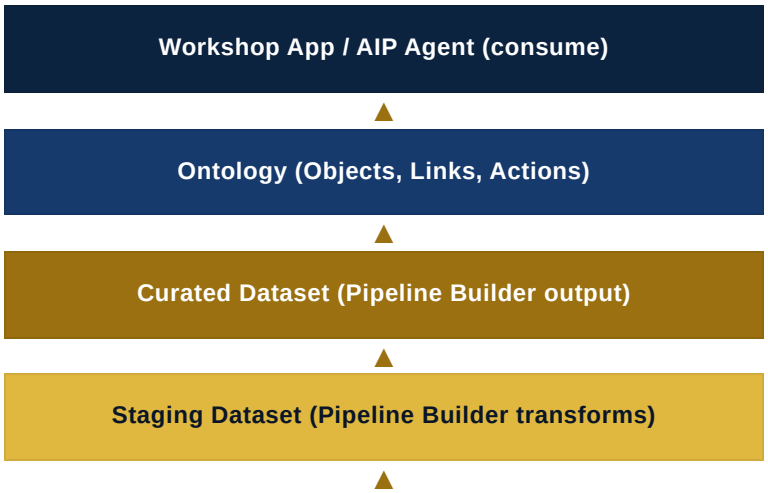
BRANCHING & GOVERNANCE

- Use Foundry branching to build and promote via UI
- Distinguish development from production environments
- Apply USAREUR-AF builder standards

*Branching = making a test copy of your work before going live. You build in the **dev branch** (your sandbox), test it, then publish to **production** (what users see).*

THE FOUNDRY DATA STACK

Data flows through layers. As a TM-20 builder, you work in the middle layers using visual tools. Never modify raw data — report data errors to your data steward instead.



Raw Dataset — READ ONLY, never modify

WORKSHOP WIDGET SELECTION

YOU NEED TO…	USE THIS WIDGET
Display many objects or records	Object Table
Show details for one selected object	Object Detail
Let users filter the data they see	Filter Panel / Dropdown
Show a chart (bar, line, pie)	Chart Widget
Show geographic data on a map	Map Widget
Let users write or update data	Button + Action or Action Form
Show a single key metric prominently	Metric Tile
Navigate between app sections	Navigation / Tab Widget

ONTOLOGY SETUP ORDER (UI STEPS)

1. Confirm curated dataset exists and is populated (Pipeline Builder pipeline passing)
2. Open **Ontology Manager** in the left sidebar
3. Create Object Type → set primary key property → map properties from curated dataset
4. Create Link Types between related Object Types (if needed)
5. Publish ontology branch and test in **Object Explorer**
6. Build Workshop app only after Object Explorer confirms objects are visible

NAMING CONVENTIONS

OBJECT TYPE	CONVENTION	EXAMPLE
Datasets (path)	`/Project/AOR/source/raw|staging|curated`	`/USAREUR/EUR/personnel/c`
Object Types	`PascalCase`	`UnitStatus`

OBJECT TYPE	CONVENTION	EXAMPLE
Properties (API name)	`camelCase`	`unitName`
Properties (display name)	Title Case	`Unit Name`
Link Types	`PascalCase` verb form	`HasEquipment`
Workshop app names	Unit + function + version	`EUR-Personnel-Readiness-`

⚑ CAUTION — SHARED RESOURCES

Changes to shared datasets and Object Types affect all downstream applications and users. Before modifying a shared resource, coordinate with your data steward.

SCHED UPCOMING TRAINING — TM-20

• ENROLLMENT

TM-10 must be complete before attending TM-20. Contact the listed POC to reserve a seat. Bring completion certificate from TM-10 on day one.

DATES	LOCATION	FORMAT	POC	SEATS	STATUS
21–25 APR 2026	Wiesbaden, Clay Kaserne, Bldg 3312, Rm 104	In-Person	SFC Chen	7 / 15	**7 SEATS REMAINING**
11–15 MAY 2026	Grafenwöhr, Bldg 244, Conf Rm B	In-Person	SSG Williams	3 / 15	**3 SEATS REMAINING**
22–26 JUN 2026	Stuttgart, Kelley Bks, Bldg 3357	In-Person	SFC Chen	15 / 15	**OPEN**
13–17 JUL 2026	Virtual (MS Teams)	Virtual	SSG Williams	20 / 20	**OPEN**

Duration: 5 days (40 hours). Course runs 0800–1700 each day. Prerequisite: TM-10 complete. All dates subject to change — confirm with POC 5 days prior.

NEXT LEVEL — AFTER TM-20

TM-30 — Advanced Builder Manual

For data-adjacent specialists: complex application design, advanced pipelines, Ontology architecture, AIP Logic, and C2DAO governance. Required prereq for all TM-40 tracks.

Continue to TM-30 →

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

BSP

Builder Sprint — Applied Build Event

Prerequisite: TM-20 + command-validated project • Quarterly • Outside TM chain • No TM credit granted

▶ BLUF

The Builder Sprint is a quarterly 5-day supervised build event. You bring a validated operational problem; you build a solution; SMEs are available for consultation. Minimal instruction — this is not a course. You leave with a functional product and a handoff package. BSP does not replace TM-30 and does not grant credit toward TM-40 enrollment.

⚠ NOTE

BSP is **outside the TM-10 through TM-50 training chain.** Completion does not count as TM-30 or any other TM credit. If you need structured platform instruction, enroll in TM-30. BSP is for builders with TM-20 skills and a real problem to solve.

WHO ATTENDS

REQUIRED

- **TM-20 Go on file** — hard requirement, no exceptions
- **Command-approved Project Brief** — submitted to C2DAO ≥14 days before Day 1
- Supervisor signature on enrollment request

PROJECT REQUIREMENTS

- Specific output: named dashboard, pipeline, Ontology type, or Quiver/Contour product
- Named consumer — a real person or role who will use the product
- All data sources accessible *before* Day 1
- No code required — Python / TypeScript / OSDK = TM-40 track, not BSP
- 5-day feasibility: functional prototype reachable within sprint

SPRINT WEEK STRUCTURE

DAY	ACTIVITY
Day 1	In-brief: scope review, environment check, kickoff (0800–0900). Build (0900–1700).

DAY	ACTIVITY
Days 2–4	Daily standup (0800, 15 min). Build (0815–1700). SME available throughout.
Day 5	Product demo / peer review (0800–1000). Go/No-Go determination (1000–1200). Out-brief and handoff (1300–1500).

GO STANDARD

STANDARD	CRITERION
Functional product	The product does what your Project Brief says it will do — your named consumer can use it
Documentation	Naming conventions followed; product description explains purpose and data sources
Handoff package	Complete by end of Day 5 — product description, data sources, limitations, maintenance guidance, promotion status, POC
Governance	Product in a branch; promotion plan documented or production promotion initiated

ENROLLMENT

TIMELINE

- **T-21 days:** Enrollment request submitted
- **T-14 days:** Project Brief approved by C2DAO
- **T-10 days:** Sprint workspace provisioned
- **T-5 days:** Candidate confirms access
- **Day 1:** Sprint begins

CADENCE

- 4 sprint events per fiscal year (quarterly)
- 4–16 participants per sprint
- 1 SME per ≤8 participants
- Annual schedule published each October

i DOCUMENTS

Participant Guide: **builder_sprint/BSP_GUIDE.md** • Coordinator Package: **builder_sprint/SPRINT_PACKAGE.md** • SOP: **training_management/BUILDER_SPRINT_SOP.md** • Project Brief form: **CAD Appendix D**

TM-30

Advanced Builder Manual — Data-Adjacent Specialists

Prerequisite: TM-10 + TM-20 • 17/25-series • G2 • Data analysts • **Open PDF →**

▶ BLUF

TM-30 is for personnel who design and own MSS solutions. This level covers complex application design (including Kairos timelines and Target Workbench), advanced Pipeline Builder, Ontology architecture, AIP Logic configuration, basic agent building in Agent Studio, Automations, Machinery, data governance, and C2DAO standards. All work is done via the UI; advanced coding and agent development are escalated to TM-40 developers.

ℹ PUBLICATION

TM-30 — Advanced Builder Manual — Full technical manual. **Open PDF →**

⚑ CAUTION

Modifications to shared datasets or Object Types at TM-30 level affect all downstream applications and users across the formation, including coalition partners. Coordinate with your unit data steward and the USAREUR-AF C2DAO before publishing any changes to production resources.

• NOTE — IS THIS YOUR LEVEL?

TM-30 covers advanced no-code building — application design, pipeline architecture, governance. If your role requires **coding, ML, or ORSA**, TM-30 is a prerequisite to a specialist track. **View Specialist Tracks (TM-40/50) →**

COMPETENCIES UPON COMPLETION

ADVANCED WORKSHOP DESIGN

- Design multi-page Workshop applications with conditional logic and variable passing
- Build dynamic layouts: show/hide panels based on user selections
- Design navigation flows and inter-page parameter handoff

ADVANCED PIPELINE BUILDER

- Build multi-source join pipelines with complex aggregations (visual)
- Design scheduled and triggered pipeline runs
- Review and interpret data lineage graphs
- Escalate to TM-40 when code transforms are required

- Publish and manage application versions

ONTOLOGY ARCHITECTURE

- Design Object Type and Link Type models via Ontology Manager UI
- Architecture thinking: model for downstream app requirements, not just source data
- Design Action workflows with validation and approval logic via UI
- Coordinate ontology changes with all downstream application owners

ADVANCED ANALYSIS

- Conduct advanced Contour analysis: complex aggregations, pivots, calculated columns, saved views
- Build advanced Quiver dashboards with multi-object analysis and linked views
- Create reusable analysis templates for unit use

AIP & AGENT STUDIO

- Configure AIP Logic workflow parameters and natural language query on Object Types
- Build **basic AIP agents** in Agent Studio — connect Object Types, write output instructions, test and validate responses
- Orient to AIP Analyst and AI FDE — awareness of the full AIP toolset
- Advanced agent development (custom tools, action logic, production deployment) is TM-40H scope

KAIROS & TARGET WORKBENCH

- Configure **Kairos** timeline widgets — Ontology-driven, real-time planning visualization (distinct from static Gantt charts)
- Orient to **Target Workbench** — targeting workflow integration; operational use is TM-40A/TM-40B scope
- Ensure Object Types are structured to support both tools

AUTOMATIONS & MACHINERY

- Configure **Automations** on Object Types — schedule or condition-triggered property updates, pipeline runs, and notifications
- Model basic business processes in **Machinery** — multi-step workflows with roles, transitions, and object linkage

GOVERNANCE & PRODUCTION

- Manage branching and production promotion via UI
- Apply USAREUR-AF C2DAO governance standards and naming conventions
- Manage governance workflows with data stewards
- Ensure coalition-facing products have C2DAO coordination and NAFv4

- Monitor automation execution history and active process instances

compliance review

TM-30 vs TM-40 — WHAT YOU OWN VS WHAT YOU ESCALATE

YOU OWN AT TM-30 (UI)	ESCALATE TO TM-40 WHEN…
Application design and UX	Custom Python/PySpark transforms needed
Ontology model design (via UI)	Functions on Objects (TypeScript) required
Advanced Pipeline Builder (visual)	Incremental watermark or code logic needed
AIP Logic configuration + basic agent building	Custom tool development, agentic action logic, or production agent deployment needed
Governance coordination	External application (OSDK) needed
Production promotion via UI	CI/CD pipeline automation needed

C2DAO GOVERNANCE GATES — HARD STOPS

REQUIREMENT	TM-30 ACTION	HARD GATE?
New shared Object Type or dataset	Coordinate with C2DAO before publishing to production	Yes
Coalition / MPE-facing data product	C2DAO coordination + NAFv4 compliance review	Yes — do not skip
Schema change to existing shared resource	Notify all downstream owners; coordinate with steward	Yes
New AIP Logic workflow on operational data	Authorization review before deployment	Yes
Access permission changes	Submit through formal request to unit data steward	Yes

SCHED UPCOMING TRAINING — TM-30

• ENROLLMENT

TM-10 and TM-20 must be complete before attending TM-30. Class size is limited. Contact POC early — seats fill quickly. Bring TM-10 and TM-20 completion certificates on day one.

DATES	LOCATION	FORMAT	POC	SEATS	STATUS
28 APR – 02 MAY 2026	Wiesbaden, Clay Kaserne, Bldg 3312, Rm 104	In-Person	CW3 Thompson	4 / 10	**4 SEATS REMAINING**
15–19 JUN 2026	Virtual (MS Teams)	Virtual	CW2 Rodriguez	15 / 15	**OPEN**
17–21 AUG 2026	Wiesbaden, Clay Kaserne, Bldg 3312, Rm 104	In-Person	CW3 Thompson	10 / 10	**OPEN**

Duration: 5 days (40 hours). Course runs 0800–1700 each day. Prerequisites: TM-10 and TM-20 complete. All dates subject to change — confirm with POC 5 days prior.

NEXT LEVEL — AFTER TM-30

Specialist Tracks — TM-40 & TM-50 Series

Twelve tracks: six Warfighting Function (WFF) tracks covering Intelligence, Fires, Movement & Maneuver, Sustainment, Protection, and Mission Command — plus six specialist tracks for ORSA, AI Engineer, ML Engineer, Program Manager, Knowledge Manager, and Software Engineer. Select your track based on MOS/role.

Access Specialist Tracks →

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

SPECIALIST TRACKS

TM-40 & TM-50 Series — WFF & Technical Tracks

WFF tracks (A–F): TM-30 req. • Technical tracks (G–L): TM-30 req.

▶ BLUF

TM-40 has two track types: **Warfighting Function tracks (TM-40A–F)** for WFF-assigned roles (Intelligence, Fires, M&M, Sustainment, Protection, Mission Command) — prerequisite TM-30, no coding required — and **Technical Specialist tracks (TM-40G–L)** for personnel who build and engineer MSS solutions (ORSA, AI Eng, MLE, PM, KM, SWE) — prerequisite TM-30. Advanced versions (TM-50G–L) are available after completing the corresponding TM-40 technical track.

TRACK SELECTION BY MOS / ROLE

ROLE / MOS	RECOMMENDED TRACK	ADVANCED
WARFIGHTING FUNCTION TRACKS (TM-40A–F)		
G2/S2 — MI units, ISR analysts	**TM-40A (Intelligence)**	—
FA officers/NCOs — Fire support	**TM-40B (Fires)**	—
Maneuver units — G3/S3 data roles	**TM-40C (Movement & Maneuver)**	—
G4/S4 — Logistics, GCSS-A	**TM-40D (Sustainment)**	—
Air defense, CBRN, force protection	**TM-40E (Protection)**	—
G6/S6 — C2 systems, networks	**TM-40F (Mission Command)**	—
TECHNICAL SPECIALIST TRACKS (TM-40G–L)		
FA49 — Operations Research Analyst	**TM-40G (ORSA)**	TM-50G
G2/S2 quantitative analyst	**TM-40G (ORSA)** or TM-40K (KM)	TM-50G / TM-50K
17A/17C — Cyber officer/NCO	**TM-40L (SWE)** or TM-40H (AI Eng)	TM-50L / TM-50H
25D — IT specialist	**TM-40L (SWE)**	TM-50L

ROLE / MOS	RECOMMENDED TRACK	ADVANCED
AI/ML engineer (GS/contractor)	**TM-40H (AI Eng)** or TM-40I (MLE)	TM-50H / TM-50I
Data scientist (GS/contractor)	**TM-40G (ORSA)** or TM-40I (MLE)	TM-50G / TM-50I
G8/S8 — Resource manager	**TM-40J (PM)**	TM-50J
Program Manager (PM / GS)	**TM-40J (PM)**	TM-50J
KMO / Knowledge Officer / 37F	**TM-40K (KM)**	TM-50K
G9 / Civil Affairs	**TM-40J (PM)** or TM-40K (KM)	TM-50J / TM-50K

TM-40 SERIES — WARFIGHTING FUNCTION TRACKS

TM-40A — Intelligence

TM-50 SERIES — ADVANCED TRACKS (Level 2)

i NOTE

TM-50 tracks are advanced-level continuations requiring the corresponding TM-40 track as a prerequisite. They cover expert-level techniques, production architecture, and operational integration at scale.

Open TM-50 Series Full Reference →

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

TM-40

Technical Specialist Tracks — Developer Manuals

Prerequisite: TM-30 • Six tracks by role • Advanced versions at TM-50

► BLUF

The TM-40 Technical Specialist tracks (TM-40G–L) cover developer-level capabilities requiring coding, advanced tooling, or specialized technical expertise — prerequisite TM-30. Warfighting Function tracks (TM-40A–F) are available by functional area and require TM-10 + TM-20 + TM-30. Select your track using the MOS/Role table on the HOME tab.

TM-40G — ORSA Track

TM-30 REQUIRED

Operations Research & Systems Analysis

FA49 • G2/S2 quantitative analysts • Wargame analysts

- Configure Code Workspaces (Python/R) within Foundry
- Statistical modeling: regression, classification, validation for readiness/logistics
- Time series forecasting with ARIMA/SARIMA patterns
- Monte Carlo simulation for COA comparison and risk quantification
- Linear programming for resource allocation and scheduling optimization
- Wargame/exercise data collection architecture and aggregation pipelines
- Analytical decision support products (Quiver/Contour) to commander standard
- Communicate uncertainty: confidence intervals, sensitivity analysis, briefing standards

PREREQ: TM-30 • ADVANCED: TM-50G • OPEN PDF →

TM-40H — AI Engineer Track

TM-30 REQUIRED

AIP Logic, Agent Studio & LLM Integration

AI/ML specialists • 17A/17C

- Author AIP Logic workflows: prompt engineering, chain design, output handling
- Build and configure AIP Agent Studio agents with tools, memory, and orchestration
- Implement LLM integration patterns: ontology data grounding, RAG, context construction
- Apply AI safety requirements: human-in-the-loop gates, output validation, OPSEC
- Write Python transforms that prepare data for AI consumption
- Connect AIP Logic workflows to Object Types and Actions
- Test and red-team AI outputs; evaluate quality against defined standards

- Deploy and monitor AIP Logic workflows in production

PREREQ: TM-30 • ADVANCED: TM-50H • OPEN PDF →

TM-40I — ML Engineer Track

TM-30 REQUIRED

Code Workspaces, Model Training & Deployment

ML engineers • Data scientists building/deploying models on MSS

- Configure Code Workspaces for model development (GPU, packages, environment management)
- Build and evaluate ML models within the Foundry environment
- Manage model versioning, experiment tracking, and reproducibility
- Deploy models to production and integrate with Ontology Objects and Actions
- Implement MLOps patterns: monitoring, drift detection, retraining triggers
- Apply responsible AI practices and model documentation standards for operational use

PREREQ: TM-30 • ADVANCED: TM-50I • OPEN PDF →

TM-40J — Program Manager Track

TM-30 REQUIRED

Agile Project Management for Data & AI Capabilities

PMs • Product owners • G8/S8 • Technical team leads

- Stand up Agile project structures (backlog, sprint cadence, ceremonies) for data and AI builds
- Write user stories and acceptance criteria that TM-40G–L developers can execute without ambiguity
- Manage the ML/AI project lifecycle: six phases from Problem Definition through Sustainment
- Translate commander requirements into prioritized, sprint-ready backlogs
- Specify project tracking systems (sprint boards, status dashboards) for TM-40L implementation
- Build and maintain risk registers; manage dependency blockers across specialist tracks
- Conduct production readiness reviews against the Definition of Done before release
- Execute change management plans for new MSS capability rollout to operational units

PREREQ: TM-30 • ADVANCED: TM-50J • OPEN PDF →

TM-40K — Knowledge Manager Track

TM-30 REQUIRED

Knowledge Repositories, AIP Summarization & Lessons Learned

KMOs • 37F • S2/S3 KM roles • AAR facilitators

- Design knowledge architecture for AAR, lessons learned, doctrine, and SOP repositories
- Build AAR capture systems using Workshop forms and Object Type pipelines
- Design and operate lessons-learned ingestion and tagging pipelines
- Use AIP Logic for knowledge summarization, search augmentation, and theme extraction
- Build full-text and semantic search systems over knowledge repositories
- Manage doctrine and SOP version control within Foundry
- Build personnel expertise mapping (skills/experience registries)
- Design knowledge transfer and unit continuity processes using MSS

PREREQ: TM-30 • ADVANCED: TM-50K • **OPEN PDF →**

TM-40L — Software Engineer Track

TM-30 REQUIRED

OSDK, Full-Stack Foundry Applications & Platform SDK

SWEs • 17A/17C • 25D

- Authenticate and query the Foundry Ontology via OSDK (TypeScript/Python)
- Execute Actions, subscribe to Object changes, handle pagination and filtering via OSDK
- Use Foundry Platform SDK for dataset operations, file management, and branch management
- Build TypeScript Functions on Objects (computed properties, bulk query patterns)
- Write and test complex Action validators with TypeScript
- Build Slate applications integrated with the Foundry API
- Apply USAREUR-AF code review and deployment standards for MSS applications

PREREQ: TM-30 • ADVANCED: TM-50L • **OPEN PDF →**

▼ WARFIGHTING FUNCTION TRACKS (TM-40A–F)

DESIGNATION	TRACK	PUBLICATION
TM-40A	Intelligence	TM_40A_INTELLIGENCE.pdf
TM-40B	Fires	TM_40B_FIRES.pdf
TM-40C	Movement & Maneuver	TM_40C_MOVEMENT_MANEUVER.pdf

TM-40D	Sustainment	TM_40D_SUSTAINMENT.pdf
TM-40E	Protection	TM_40E_PROTECTION.pdf
TM-40F	Mission Command	TM_40F_MISSION_COMMAND.pdf

NEXT LEVEL — AFTER TM-40

TM-50 — Advanced Developer Tracks

Expert-level continuation of each TM-40 specialist track. For senior technical leads, platform architects, and developers building enterprise-scale MSS capabilities.

Continue to TM-50 →

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

TM-50

Advanced Developer Tracks

Prerequisite: TM-40 (by track) • Tracks TM-50G–L • All 6 tracks available

▶ BLUF — ADVANCED TRACKS

The TM-50 series provides advanced-level instruction for each developer track, building directly on the corresponding TM-40 specialist manual (TM-40G–L). Intended for senior technical leads, platform architects, and senior developers designing enterprise-scale MSS capabilities. All 6 tracks are complete and available.

TM-50 SERIES — PUBLICATIONS

TM-50G — ORSA Advanced

ADVANCED

Advanced ORSA

Prerequisite: TM-40G

- Nonlinear programming, stochastic models
- Agent-based modeling (ABMS)
- Campaign wargame data architecture

TM-50H — AI Engineer Advanced

ADVANCED

Advanced AI Engineering

Prerequisite: TM-40H

- Multi-agent orchestration & shared state
- Advanced RAG, domain-adapted LLMs
- AI red-team assessment & observability

TM-50I — ML Engineer Advanced

ADVANCED

Advanced ML Engineering

Prerequisite: TM-40I

- Automated retraining pipelines

- Transformer fine-tuning, GNNs
- Federated retraining, adversarial robustness

TM-50J — PM Advanced

ADVANCED

Advanced Program Management

Prerequisite: TM-40J

- PI planning, cross-team governance
- GO/SES briefing, Palantir partnership
- Technical debt at program scale

TM-50K — KM Advanced

ADVANCED

Advanced Knowledge Management

Prerequisite: TM-40K

- Federated KM architecture, NATO integration
- STANAG 4778 conformance
- Knowledge graphs at scale

TM-50L — SWE Advanced

ADVANCED

Advanced Software Engineering

Prerequisite: TM-40L

- Scale, multi-tenancy, event streaming
- OWASP, SAST, authorized pen testing
- Architecture review, platform governance

• NOTE — PREREQUISITES

Each TM-50 track requires completion of the corresponding TM-40 track. Personnel should confirm TM-40 proficiency with their data steward before beginning TM-50 content. Contact the USAREUR-AF Operational Data Team for access questions.

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

DRAFT PUBS

Draft Data Literacy Publications

DRAFT — Not yet approved for distribution • Foundational data literacy content • Platform-agnostic

⚑ CAUTION — DRAFT PUBLICATIONS

These publications are in draft status and have not been approved for official distribution. Do not distribute outside the USAREUR-AF training program without authorization from the USAREUR-AF Operational Data Team.

▸ BLUF

Before touching MSS, understand *why* data matters. Data Literacy for Senior Leaders is written for commanders and senior leaders. Data Literacy Technical Reference is the comprehensive reference for all personnel. Neither publication is platform-specific.

SENIOR LEADERS (O-5+ / SGM+)

Data Literacy for Senior Leaders

Written for commanders, senior NCOs, and senior civilians. Covers command responsibilities, evaluating data products, directing a data-capable formation, and decision frameworks.

Format: Short (~20–30pp). Principles, not procedures. Chapter/paragraph numbered.

Key topics: Commander's data responsibilities • Evaluating analytical products • Standing up MSS capability • Data governance and stewardship

ALL PERSONNEL

Data Literacy Reference

Comprehensive platform-agnostic data literacy reference. Recommended prior reading before TM-10.

Format: Long (~50–100pp). Examples, vignettes, detailed explanations, annexes.

Key topics: Data types and structures • Pipeline concepts • Data quality • Analysis fundamentals • Security and classification • Operational data integration • Governance

FULL PUBLICATIONS INDEX

PUBLICATION	AUDIENCE	PURPOSE	WHEN TO READ
FOUNDATION — ALL PERSONNEL			
Data Literacy (SL)	O-5+ / SGM+, Sr Civilians	Principles, command responsibilities	Before directing MSS use
Data Literacy	All personnel	Comprehensive data literacy reference	Before TM-10 (recommended)
TM-10	All personnel	Operate MSS as end user	Before first MSS access
TM-20	All staff	Build pipelines, Ontology, Workshop via UI — no code	After TM-10
TM-30	Data-adjacent specialists	Design complex apps; governance; C2DAO standards	After TM-10 + TM-20
TM-40 — WARFIGHTING FUNCTION TRACKS (BY WFF ASSIGNMENT)			
TM-40A	G2/S2, MI, ISR	Intelligence WFF MSS integration	After TM-30
TM-40B	FA, fire support	Fires WFF MSS integration	After TM-30
TM-40C	Maneuver, G3/S3	Movement & Maneuver WFF MSS integration	After TM-30
TM-40D	G4/S4, logistics	Sustainment WFF MSS integration	After TM-30
TM-40E	Air defense, CBRN, force protection	Protection WFF MSS integration	After TM-30
TM-40F	G6/S6, C2, networks	Mission Command WFF MSS integration	After TM-30
TM-40 — TECHNICAL SPECIALIST TRACKS (BY ROLE/MOS)			

PUBLICATION	AUDIENCE	PURPOSE	WHEN TO READ
TM-40G	ORSA / FA49	Statistical modeling, simulation, wargame analytics	After TM-30
TM-40H	AI Engineers	AIP Logic authoring, Agent Studio, LLM integration	After TM-30
TM-40I	ML Engineers	Code Workspaces, model training, MLOps	After TM-30
TM-40J	PMs / G8	PM dashboards, milestone tracking, portfolio analysis	After TM-30
TM-40K	KMs / KMOs	Knowledge repositories, AIP summarization, lessons learned	After TM-30
TM-40L	SWEs	OSDK, full-stack Foundry apps, TypeScript Functions	After TM-30
TM-50 — ADVANCED TECHNICAL TRACKS (BY ROLE/MOS)			
TM-50G–L	Senior developers (all tracks)	Advanced versions of each TM-40 specialist track	After TM-40 (by track)
CDA REFERENCE — TM-30 AND SPECIALIST TRACKS (TM-40G–L)			
EA Series (00–05)	TM-30+, TM-40K, TM-40L	Enterprise Architecture — foundation, schools of thought, artifacts, governance, military application	With or after TM-30
CDA Doctrine Overview	TM-40G–L	Doctrine-driven development; JRTC lessons; Foundry Ontology blueprint	At start of TM-40G–L
Identity vs. Classification	TM-30, TM-40K, TM-40L	Identity resolution and classification governance at scale	With TM-30
Enterprise Data Compass	TM-40J, TM-40K	Authoritative data architecture, ontology, and semantic governance standard	With TM-40J/K

PUBLICATION	AUDIENCE	PURPOSE	WHEN TO READ
CDA Slide Library	All tracks (prereq reading)	29 decks — Intro To Data (TM-10 prereq), Data 101 (TM-20 prereq), Data 201 (TM-30/40G–L prereq)	Before each TM level

CDA REFERENCE MATERIAL

• SPECIALIST TRACK PREREQ READING

The CDA Reference material below is required reading for TM-30 and all TM-40G–L specialist tracks. It is **not** required for TM-10/20 or WFF tracks (TM-40A–F). Consult the DEPENDENCY_MAP for per-track required reading.

ENTERPRISE ARCHITECTURE SERIES

EA-00 through EA-05

Six-module reference series covering EA foundations, schools of thought, artifacts and views, governance, and military application. Supports TM-30, TM-40K, and TM-40L.

Key topics: EA vs DA • TOGAF, Zachman, DODAF frameworks • Capability mapping • NAF/ArchiMate • Army EA governance

CDA DOCTRINE SERIES

Doctrine-Driven Development

Doctrine-aligned data product design using JRTC lessons learned. Covers doctrine-first Ontology design, the Three-Generation Dilemma, and AVT25 assessment case study.

Key topics: MDMP data support • COA analysis modeling • Doctrinal object types • AVT25 tools case study

CORE DATA LITERACY CONCEPTS

DATA TYPES

Structured (tables, rows, columns) • Semi-structured (JSON, XML) • Unstructured

DATA PIPELINE

Raw → Staging → Curated → Ontology → Application. Each layer adds quality,

(documents, images). MSS ingests all three types from Army source systems.

structure, and meaning. Never modify raw data — it is the source of truth.

DATA QUALITY

Accuracy, completeness, consistency, timeliness, uniqueness. Bad decisions follow bad data. Report quality issues to your data steward rather than working around them.

DATA GOVERNANCE

Ownership, stewardship, access control, classification markings. Every dataset has an owner. Every user has a role. Access is audited. Misuse is tracked and prosecuted.

• NOT FINDING WHAT YOU NEED?

Contact your unit data steward for additional publications, source files, or access to restricted materials. For technical support, visit the **Support page →** For task-level procedures, use the **Task Index →**

QUICK REF

MAVEN SMART SYSTEM — QUICK REFERENCE CARD

ℹ NEW TO MSS?

Start with the Quick Start guide before reading TM-10. Operational in 30 minutes: log in via CAC, navigate to your unit's app, filter data, export a view. → **QUICK_START.pdf** • No account yet? Contact your unit data steward.

▶ BLUF

All personnel start at TM-10. Builders add TM-20; data-adjacent specialists continue to TM-30; technical roles select their TM-40 track below.

COMMON DAILY TASKS

TASK	HOW
Find a record	Search bar or Filter Panel
Filter the view	Select values in the Filter Panel
Export data	**Export** / **Download** button → CSV or Excel

SECURITY — DO NOT

- Do **not** export data to a personal device or unapproved storage
- Do **not** share your MSS **credentials** with anyone — URLs and screenshots are fine unless data is sensitive
- Do **not** enter classified information into MSS unless your instance is approved for that classification level

TASK	HOW
Submit or update a record	Click record → **Action button** → fill in → Submit

- Do **not** screenshot or share MSS screens containing data above your network's approved classification
- Do **not** use MSS on public or unsecured Wi-Fi
- If you see data you should not have access to — **stop and report to your data steward immediately**

WHEN IT BREAKS

Can't log in
Check CAC is fully inserted; try a different port. No account? Request at mss.data.mil or through your data steward. Provisioning generally within 24 hrs; if not active after 24 hrs, contact your data steward.

Button greyed out / no access
You're missing a role or write permission. Contact your data steward to request the correct access level.

App won't load
Hard-refresh (Ctrl+Shift+R). Clear cache. Try a different browser. Still broken → Help Desk →

DATA STEWARD
Account access • data issues • permission requests

HELP DESK
App broken • won't load • technical errors → Support →

ODT
Training questions • new app or pipeline requests

DONE WITH QUICK REFERENCE?

Go to Home / Start Here

Find your training level, follow the full path, and navigate to your TM using the Home page overview.

SUPPORT

Getting Help — USAREUR-AF

▶ BLUF

Know who to call before you have a problem. Route issues correctly from the start. Collect information before calling for help — it speeds resolution significantly.

⚠ WARNING — SECURITY INCIDENTS

If you suspect a security violation, report immediately to your supervisor and unit security officer. Do not investigate or resolve it yourself. Preserve the screen state; do not close the window or clear the browser.

CONTACT ROUTING

ISSUE	ROUTE TO	PRIORITY
Cannot log in / CAC issues	MSS Help Desk	Normal
No access to a project or dataset	Unit data steward	Normal
Data appears incorrect	Unit data steward (do not self-correct)	Normal
System error, crash, or outage	MSS Help Desk + screenshot + error code	Normal
Application broken or not loading	MSS Help Desk	Normal
Building question / how-to	Unit data lead or USAREUR-AF data team	Normal
Governance / C2DAO question	USAREUR-AF C2DAO	Normal
Security incident	**Supervisor + unit security officer**	**IMMEDIATE**

BEFORE CALLING FOR HELP — COLLECT THIS INFORMATION

- Your username and unit
- Name of the application, dataset, or pipeline you were using
- Exact error message (screenshot preferred)
- Time the error occurred (local or Zulu — state which)

- Steps that led to the error in order
- Browser and workstation you are using

PREREQUISITES BEFORE FIRST LOGIN

1. **Annual Cyber Awareness Training** — required for all DoD personnel; must be current
2. **MSS User Onboarding Brief** — provided by unit data steward
3. **Account request approved** — submit at **mss.data.mil** or through your unit data steward; provisioning generally completes within 24 hours. If access is not active after 24 hours, contact your data steward directly.
